

Chimeras with time-dependent migration rates

Figure 1: No time dependence of migration coefficient σ , 20 node chain.

1 Oscillatory Migration

Exploring oscillations over several orders of magnitude of speed

Figure 2: Migration oscillates in time, $\sigma \sim |\cos(t)|$

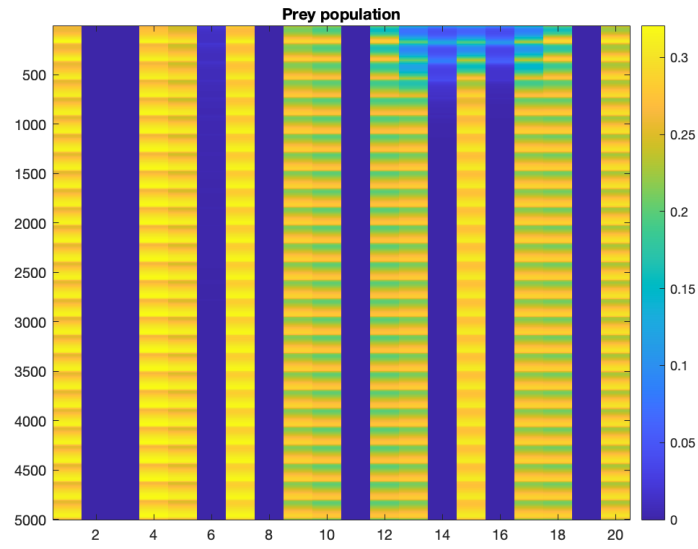

Figure 3: Migration oscillates in time, $\sigma \sim |\cos(t/10)|$

Figure 4: Migration oscillates in time, $\sigma \sim |\cos(t/100)|$

Figure 5: Migration oscillates in time, $\sigma \sim |\cos(t/1000)|$

2 Increasing Migration Rates

Figure 6: Migration increases linearly in time, $\sigma \sim \frac{t}{t_{final}}$

Figure 7: Migration increases quadratically with time, $\sigma \sim (\frac{t}{t_{final}})^2$

3 Decreasing Migration Rates

3.1 Polynomial rates of decay

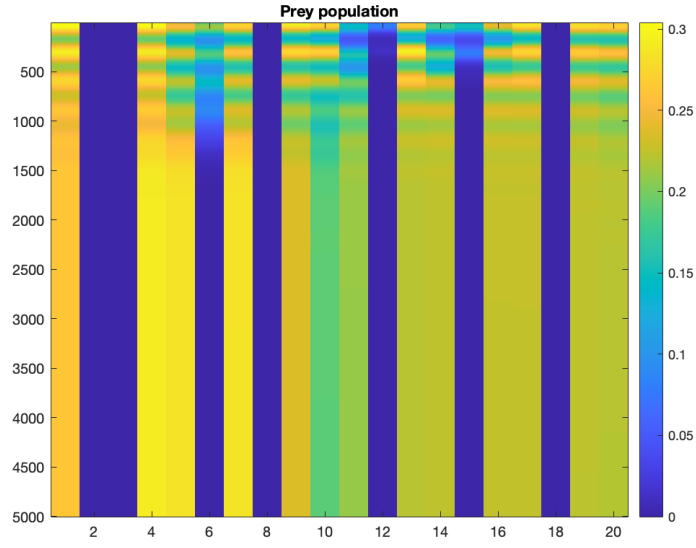

Figure 8: Migration decays linearly in time, $\sigma \sim \frac{(t_{final}-t)}{t_{final}}$

Figure 9: Migration decays quadratically in time, $\sigma \sim (\frac{(t_{final}-t)}{t_{final}})^2$

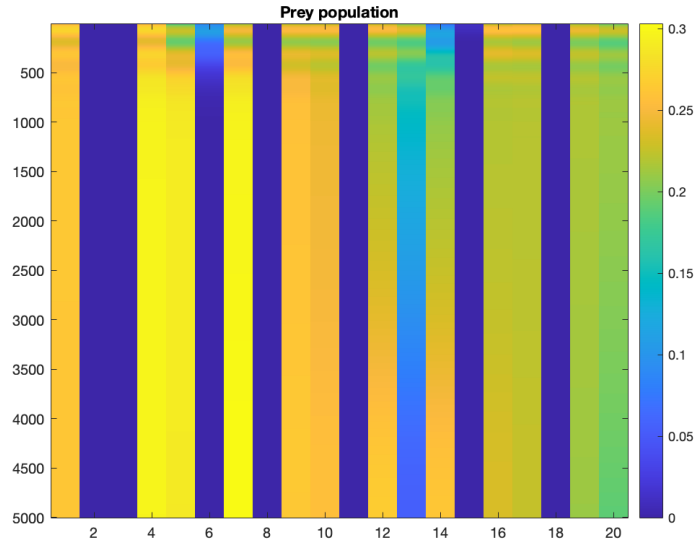

Figure 10: Migration decays quartically in time, $\sigma \sim (\frac{(t_{final}-t)}{t_{final}})^4$

3.2 Exponential rates of decay

Figure 11: Migration decays exponentially in time, $\sigma \sim e^{-t}$

Figure 12: Migration decays exponentially in time, $\sigma \sim e^{-0.01t}$

Figure 13: Migration decays exponentially in time, $\sigma \sim e^{-0.001t}$

Figure 14: Migration decays exponentially in time, $\sigma \sim e^{-0.0009t}$

Figure 15: Migration decays exponentially in time, $\sigma \sim e^{-0.0001t}$
