

To use Git within MATLAB: When you right-click within the MATLAB file navigator, you get the option to "Manage Files":

Then the following window pops up:

If you have a Git repository on GitHub (or GitLab or wherever), you can get a link to the repository, and you paste this link into "Repository path". After you've done that, you can push/pull to and from the repository within MATLAB. After you completed this step of connecting your Matlab folder with the repository, the options for push/pull/etc. appear under "Source Control" as here:
